

Simplify Networking with Zyxel Nebula Cloud Controller (NCC)

Why Nebula?

Scalable Growth

Flexible Expansion: Easily add new devices or locations as your business grows, without complex configurations.

Multi-Site Management: Control multiple branches or stores from the same dashboard, ensuring consistent performance across all locations.

Cost-Effective Solution

No IT Staff Needed: Save on staffing costs by leveraging a system that's simple enough for anyone to manage.

Affordable Licensing: Flexible plans that fit your budget, with no hidden fees or costly add-ons.

Reduced Maintenance Costs: Cloud-based updates and monitoring mean less downtime and fewer expenses related to network upkeep.

Easy Setup & Management

Plug-and-Play Installation: Get your network up and running in minutes without technical expertise.

Intuitive Dashboard: Manage your entire network from a single, easy-to-use interface accessible from any device.

Zero-Touch Provisioning: Automatically configure new devices as soon as they're connected, reducing the need for on-site support.

Enhanced Security & Reliability

Automatic Updates: Keep your network secure with the latest protections without lifting a finger.

24/7 Monitoring: Proactive alerts notify you of any issues, allowing for quick resolution before they impact your operations.
